

Searchline Excel™ Edge

The Searchline Excel™ Edge Flammable Hydrocarbon gas detector delivers long-range coverage and protection for perimeter and fence-line monitoring.

LONG-RANGE PERIMETER MONITORING IN HARSH CONDITIONS

Designed for long-range perimeter and fence line monitoring applications, the Searchline Excel™ Edge helps protect your people, facilities and processes from combustible gas leaks. When mounted at the edge/perimeter of your facility, it provides long-range

monitoring and reliable detection in harsh and changing environments for protection and peace of mind.

ELEVATE YOUR ENVIRONMENTAL DUE DILIGENCE

The Searchline Excel™ Edge's innovative optical gas detection capabilities cover a longer range and see through even thick fog better than any other open path gas detectors whether NDIR or laser based.

Features & Benefits:

Reliable Detection:

- Fast response to flammable hydrocarbon gas even in low visibility
- Advanced diagnostics including window clarity and alignment accuracy to enable maximum uptime

Easy to Use:

- Honeywell's Fixed Platform Universal Mount and new alignment scope makes for easy installation
- Bluetooth® connectivity for simplified, non-intrusive set-up and maintenance.

At a Glance Instrument Status:

- High Visibility, Multi Color LED HALO ring provides clear indication of device status

Quick Specs:

- Detection from 60 to 330 meters (196 to 1082 feet)
- Multiple outputs including 4-20mA, Relays, HART®, Modbus and Bluetooth® communication
- Responses to a wide range of hydrocarbon gases such as Methane, Ethane, Propane, Butane, Pentane, Hexane, Ethylene, and Propylene
- Speed of response (T90) less than 3 seconds
